# Zakariyyaa Davids

Software Engineer

## Summary

I am a passionate software developer driven to craft innovative solutions that make a meaningful impact and push technological boundaries. Eager to expand my skills and stay ahead of emerging technologies, I am committed to continuous learning and growth. I believe my curiosity and adaptability will contribute positively to any team or organization, and I am excited for the opportunity to apply my knowledge and drive. Thank you for considering my CV—I look forward to the possibility of contributing to your team.

## Experience

### Student Developer | WeThinkCode\_ (2023-2024)

- Gained hands-on experience in Java, Python, and web development through collaborative and solo projects, working towards mastering both core and advanced concepts.
- Worked on real-world applications, including building and synchronizing server-client architectures, APIs, and databases.
- Participated in daily standups and team-building activities, fostering collaboration with diverse teams and learning to unify different perspectives and ideas.
- Developed key skills in version control, Docker, and CI/CD pipelines for efficient deployment and scaling of applications.
- Gained practical experience in creating robust, scalable applications while enhancing problem-solving, communication, and teamwork abilities.
